Key Business Insights & Recommendations:

- Worst Margin Region:** West / South — driven by higher discretionary discounting (up to 25%) and heavy Electronics sales.
- Category to Investigate:** Electronics — generates the highest revenue volume, but carries the lowest gross margin % due to high unit cost and discount sensitivity.
- Low Month:** February experienced a clear post-holiday revenue dip below the annual monthly run rate.
- Rep Performance:** The lowest revenue rep relied on fewer transactions and higher discounts, eroding gross profit.
- Recommendation:** Cap discretionary rep discounts at 10% on items over £100 (requiring manager approval for higher) and bundle high-margin accessories to protect gross margin.
